Red

Blue

Allegheny Flint

Also Available in Black & White

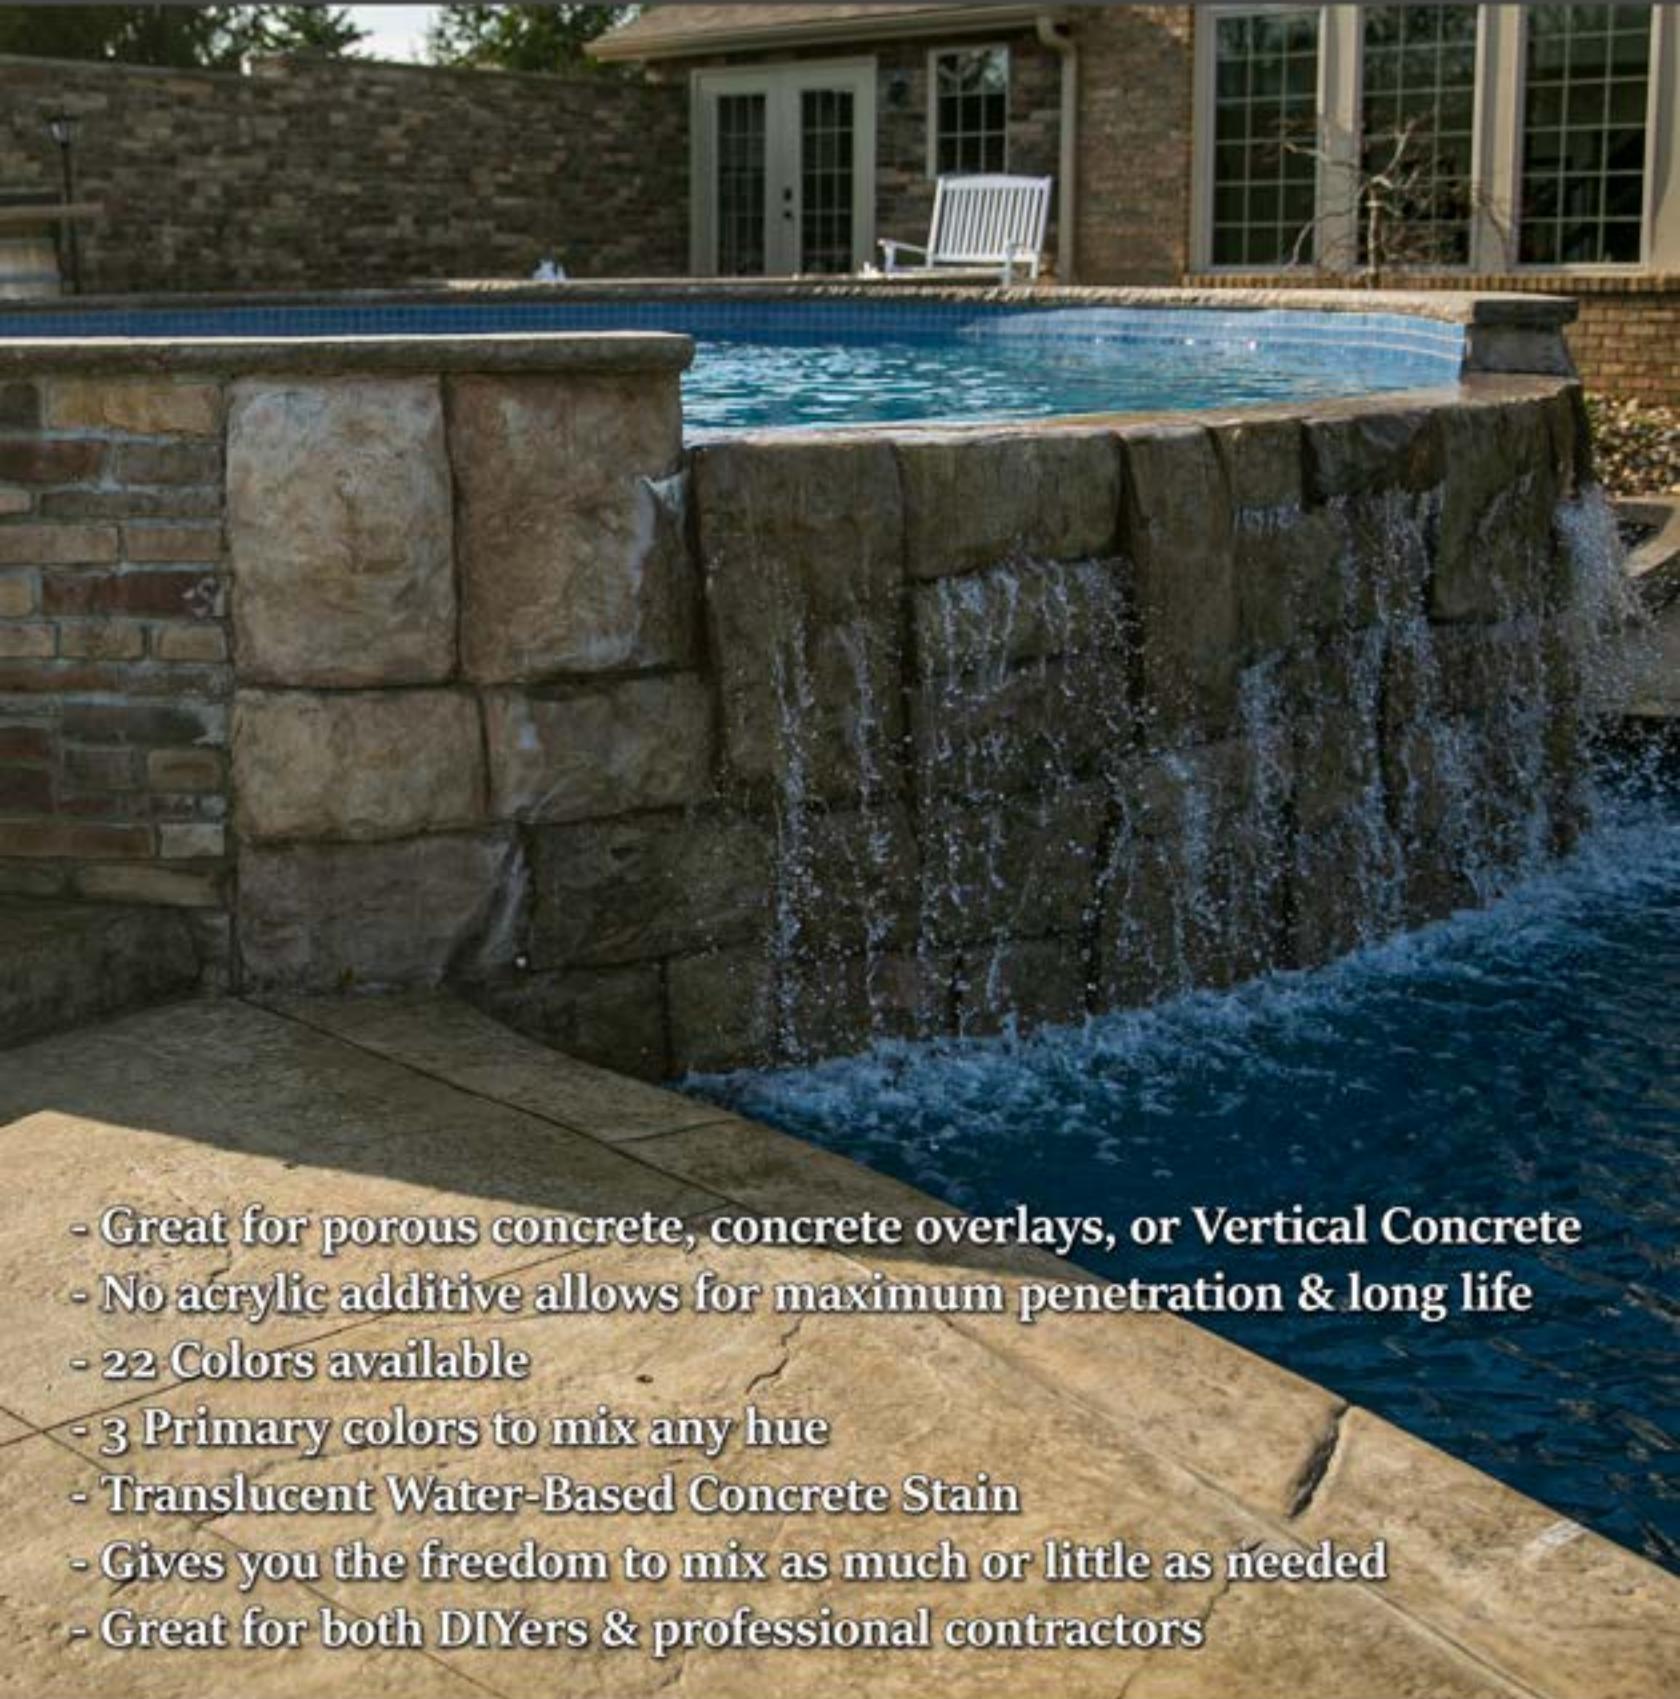

This color guide is designed to show a representation of Deco-Crete Water Based Concrete Stain when applied to natural gray concrete then sealed. It does not guarantee the final color is an exact match. Color affects will vary when applied to stamp overlays, microtoppings, and integrally colored concrete. Because there are so many variables involved – mix design, age, porosity, texture, & color of concrete substrate – each application of Deco-Crete Water Based Concrete Stain creates unique results. Deco-Crete strongly recommends that a job site sample be performed for each application. Deco-Crete Water Based Concrete Stain samples should be done in an inconspicuous area.
